

## Diversify Your Fulfillment & Save

If you use FedEx or UPS shipping software and send over 20 domestic (or just a few international) packages a day, Platinum Shipper gets you big savings on your shipping expenses by avoiding common surcharges & taking advantage of postal alternatives. Platinum Shipper provides seamless access to these savings using Endicia address verification, residential & rural extended area surcharge prediction, and USPS postage-paid shipping label generation & management. All this, using the same software, hardware, process, and database integration you already have built with your existing free carrier software. Platinum Shipper is offered through Automated Systems, Inc.

**Save With Address Correction** Platinum Shipper sits alongside your carrier software giving you seamless access to transportation savings. It uses Endicia's **address verification** system to avoid bad addresses and surcharges which run \$5-\$10 per address. At the rate of 1-2% many customers report for address corrections, these surcharges can add up to thousands of dollars of preventable expenses. More importantly, Platinum Shipper alerts you to address corrections before you ship, so you avoid delays in your shipments. Without this pre-shipment advice, most shippers don't even know they're paying these charges. Click here for more [savings](#) and [advantages](#).

**Keep Your Existing System.** You don't have to change any of the accounting & database interfaces you already have - you continue using your free carrier software as before, only now you have access to postal savings with each package you ship.

Platinum Shipper works with

- FedEx ShipManager,
- UPS WorldShip®, and
- Kewill Clippership.

There are no minimum volume requirements to use Platinum Shipper, no audits, no long waits for certification, and you can get your shipments picked up.

**Know Before You Ship.** Platinum Shipper identifies addresses in residential & extended areas before you ship. Commercial carriers can charge an extra \$1.85-\$4.05 per package to these addresses, and you won't know these charges until it's too late. Platinum Shipper lets you see the true cost of shipping with the carrier and displays alternative US Postal Service shipping rates. Now, you can make an informed decision on the fly, and if you decide to use postal shipping, you can print an Endicia label with just a click of a button.

**Print Postage-Paid Shipping Labels.** Platinum Shipper includes all the features of Endicia Premium and more. Print complete, postage-paid, customizable [shipping labels](#) with [hidden postage amounts](#), and you can automatically send [shipment notification emails](#); so you'll reduce customer inquiries. Send to APO/FPO destinations along with PO Boxes, Hawaii and Alaska and take advantage of Saturday Delivery at no additional cost. For International destinations, your labels come with [prefilled customs forms](#). When your packages are picked up, [Bulk Acceptance Scans](#) show your customers that their product is on its way. You'll also save up to 67% with [discounted insurance](#), and you can [customize](#) your labels and assign a different label format to each mail class you use. You can view [postage statements](#) online, glance through your transactions, lookup a package, or see the delivery statistics on all your tracked mail.

**Platinum Shipper prints all these labels, and more, right on your current thermal label printer:**
